# Introduction to Tableau

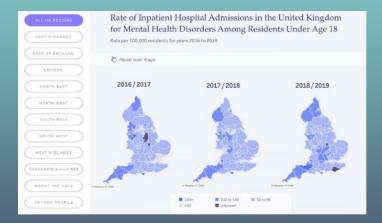

Your new data analysis software

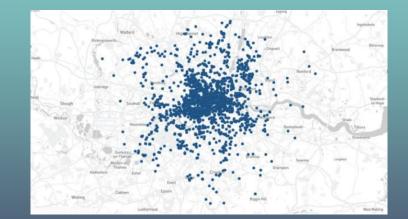

#### **Data Visualization with Tableau**

# **Tableau Public Gallery**

#### Import Data

Download the sample datafile "SuperStore\_Data" and open it with your Tableau.

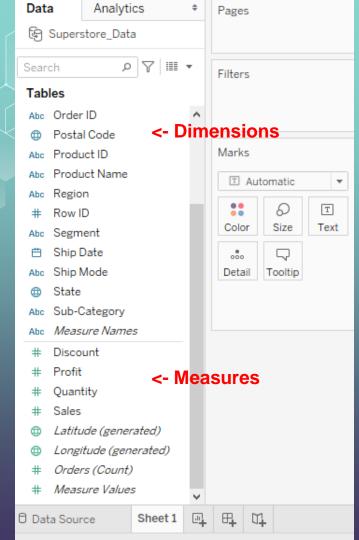

You can choose different sheets from the excel file, e.g., "Orders".

Once the file is open, check the data type first.

# Check Data Type

|                              | Sort | fields Data sourc         | e order 🔻                 |      |                            |       |           | Show ali                     |

Open "Sheet 1" and you will get to the following page.

Measures are variables that can be calculated.

Dimensions are used to partition your measures (e.g., partition the data based on geographic locations).

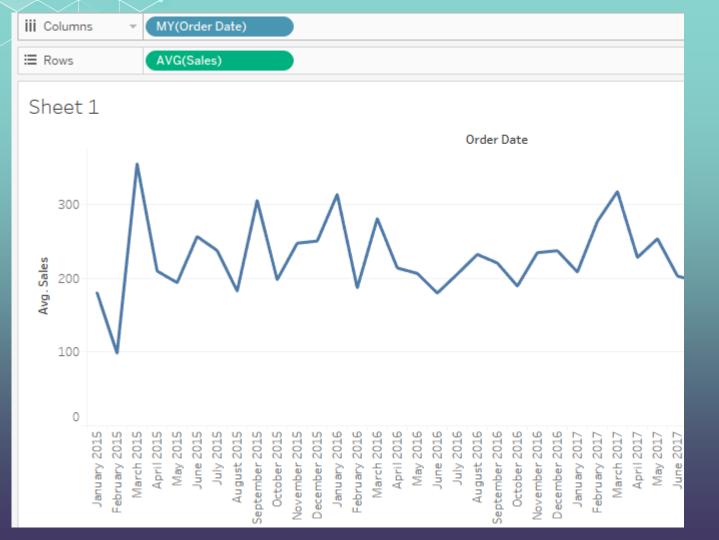

Here, Sales is a measure.

Order date is a dimension.

We partition sales based on year of order.

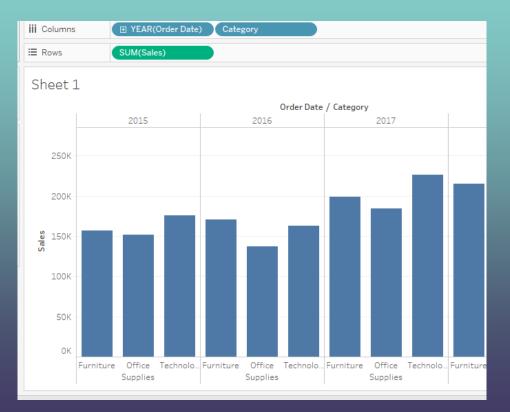

You can also change the properties of your rows and columns.

Here, we use average sales instead of total sales, and use month/year partition instead of year partition.

# **Adding Category As Another Classifier**

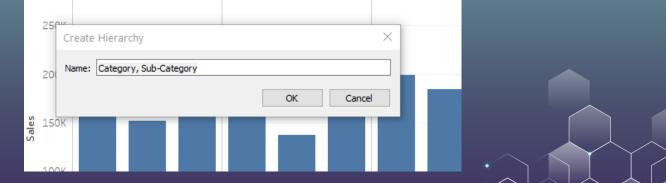

### **Create Hierarchy**

There are several subcategories within each product category (e.g., there are many kinds of furniture with the furniture category), and this information is kept as "subcategory".

Now, drag "subcategory" to "category" and rename it as "products".

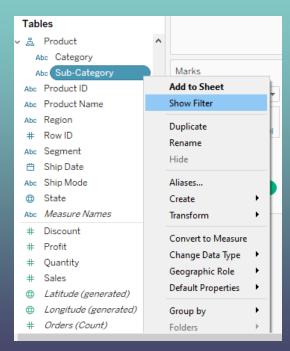

# **Create Hierarchy**

#### Then, you can display each product subcategories.

| iii Columns | ▼ ( YEAR(Order Date) ( Category ▼ Sub-Category |
|-------------|--|
| I Rows      | SUM(Sales)                                     |
| Sheet 1     |  |

# **Apply Filters**

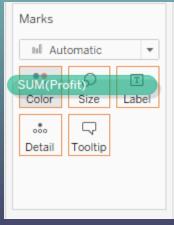

| Sub-Category   |
|--|
| Sub-Category (AII) Accessories Appliances Art Binders Sockases Chairs Copiers Envelopes Fasteners Furnishings Labels Machines Paper Phones Storage |
| Supplies ✓ Tables  |

٠

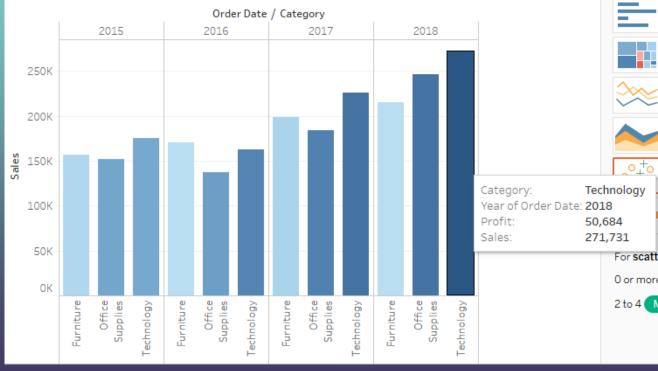

### **Color Your Output**

Suppose that you want to color your figure based on the profit of your products.

Drag profit to color.

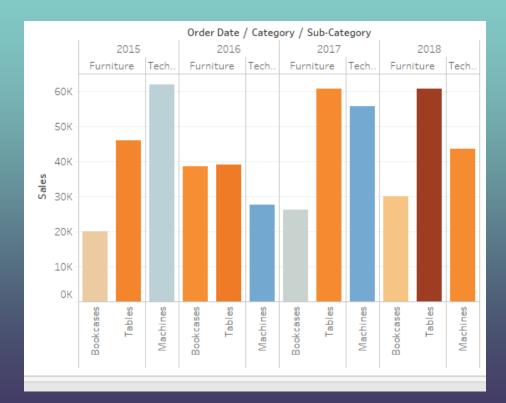

#### **Color Your Output**

| SUM(Profit) |        |
|-------------|--------|
|             |        |
| 3,015       | 50,684 |

# **Apply Filters**

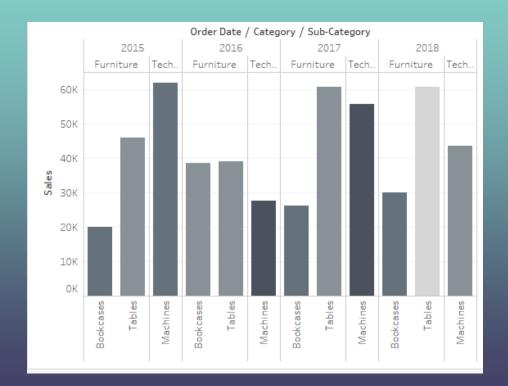

# **Edit Colors**

|                             | United States                 | United State                      | 5                        |                              |                              |
|                             | Florida                       | United State                      | 25                       |                              |                              |

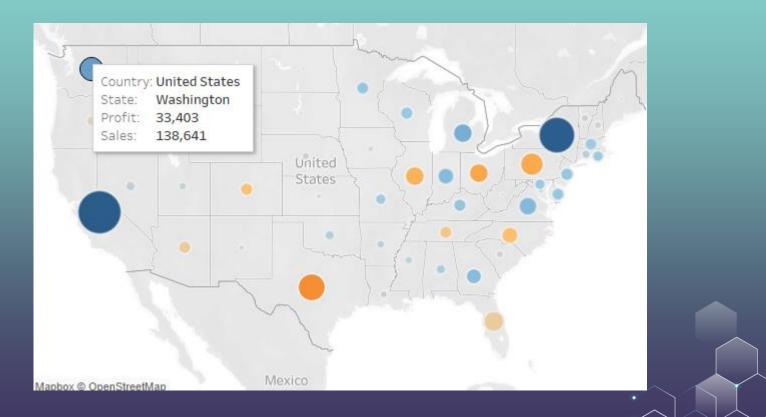

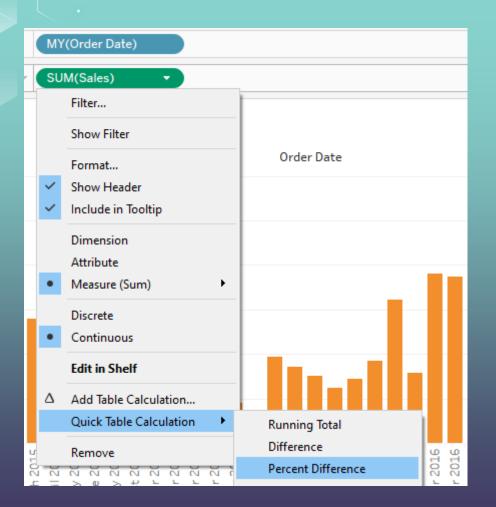

We can use profit to select the color of the circles in the map.

Moreover, we adjust the size of the circles.

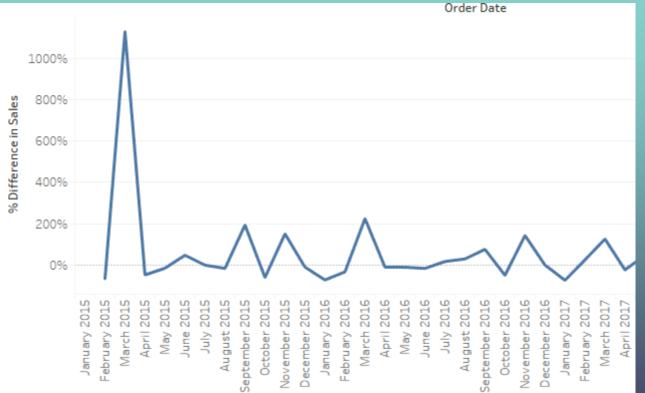

Here, we want to calculate how the sales change over time.

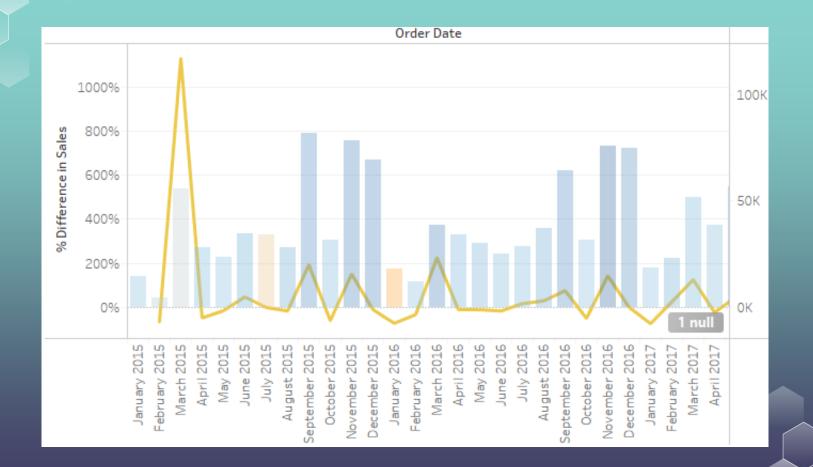

April 201

٠

|   | Attribute               |            |
|---|-------------------------|------------|
| • | Measure (Sum)           | - +        |
|   | Discrete                |            |
| • | Continuous              |            |
|   | Edit in Shelf           |            |
|   | Compute Using           | - F        |
|   | Relative to             | - <b>-</b> |
| Δ | Edit Table Calculation  |            |
|   | Clear Table Calculation |            |
|   | Quick Table Calculation |            |
| ~ | Dual Axis               |            |
|   | Mark Type               | +          |
|   | Remove                  |            |

We want to put both sales and sales change in a single plot.

### **Regression Analysis**

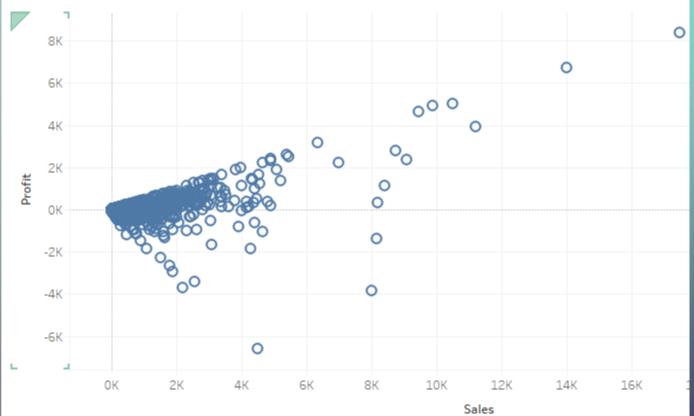

Suppose that we want to run the following regression:

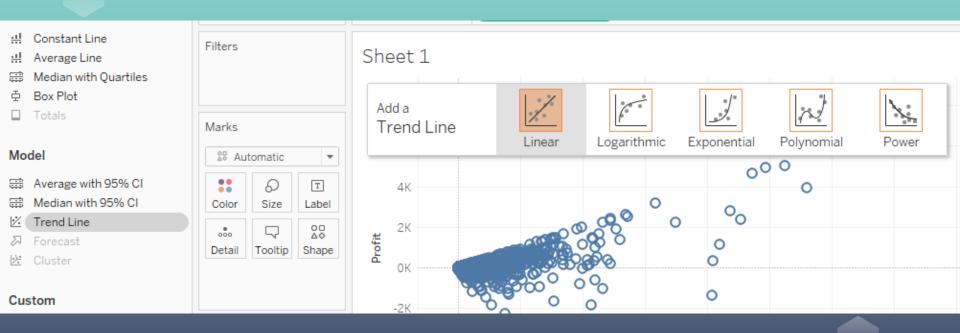

Profit = a + b Sales

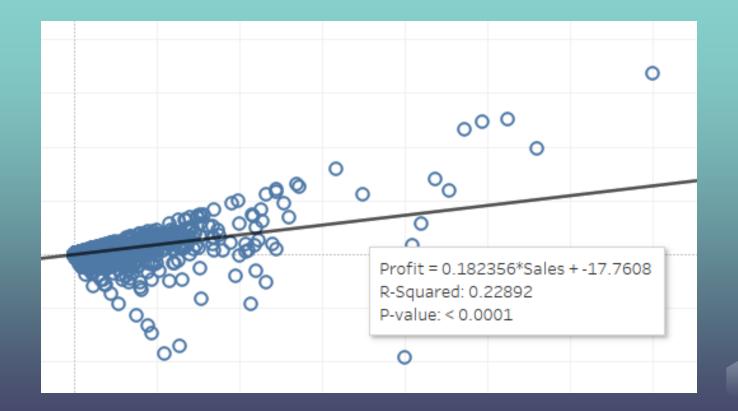

Go to analytics page. Use sales as columns and profit as rows.

Set "dimensions" for each variable.

# THE MOVIE DATASET

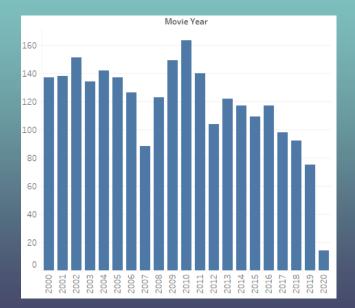

#### THE MOVIE DATASET

This dataset contains information for 2,476 movies for the last 20 years, including their budget, domestic box office, international box office, actors, genre etc.

The original dataset can be found <u>here</u>.

#### Number of Movies by Year

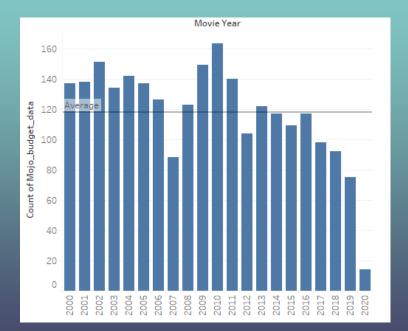

Columns: Movie Year

Set "Movie Year" as discrete

Rows: CNT(Mojo\_budget\_data)

Set "Marks" to be "Bar"

#### Number of Movies by Year

Go to Analytics Menu.

Drag "Reference Line" to the Plot.

Similarly, you can add median to your plot.

### Number of Movies by Year

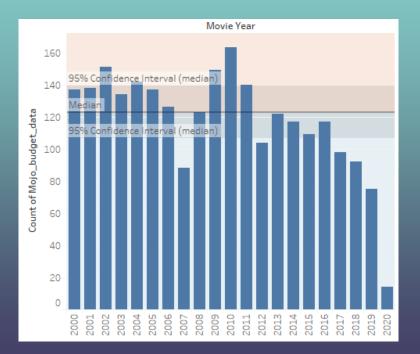

Now we plot the confidence interval of the mean.

After dragging "Reference Line" to the Plot, change "Line only" to "Line and confidence interval".

You can specify your CI.

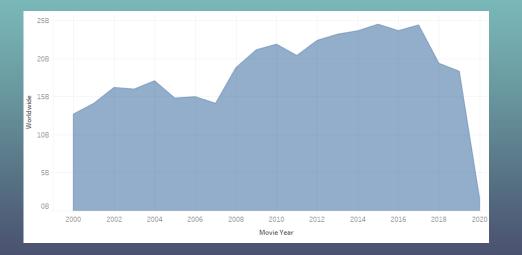

#### Number of Movies by Year

Now we add colors to the plot.

After dragging "Reference Line" to the Plot, you can change colors under "Formatting": "Fill above" and "Fill below".

The color in the confidence band is darker than that outside.

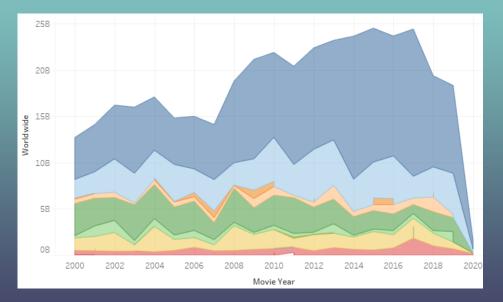

#### Columns: Movie Year

#### Rows: Worldwide (SUM)

Show me:

Columns: Movie Year

Rows: Worldwide (SUM)

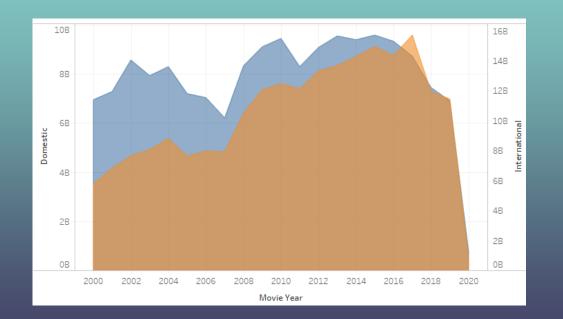

Drag "Genre 1" to Color under Marks Menu.

#### Columns: Movie Year

Rows: Domestic (SUM) and International (SUM)

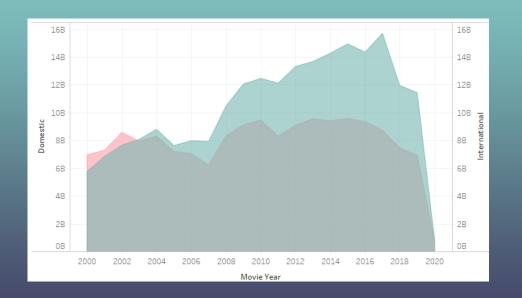

Select Area Chart

#### Right Click International (Second Chart)

Choose "Dual Axis"

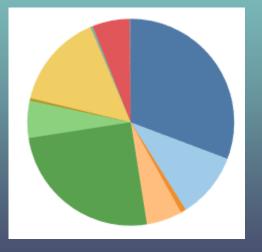

Right Click Domestic

Choose "Synchronize Axis"

Update Color on the right-hand side if you want

# Genre Pie Chart

Columns: Genre 1

Rows: CNT(Mojo\_budget\_data)

Show me: Change "standard" (top) to "entire view"

# Genre by Year

#### Under Data Menu, choose Create Calculate Field

Input the following calculation.

Click OK to proceed.

| _ | vv | or | C | wi | d | ρ        |
|---|----|----|---|----|---|----------|
|   |    |    | 5 |    | 9 | <u> </u> |

-[Worldwide]

 $\times$ 

Under Analysis Menu, choose Create Calculate Field

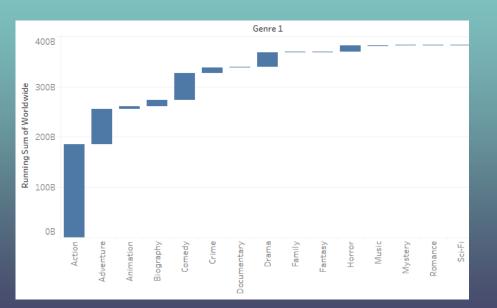

Input the following calculation.

Click OK to proceed.

The calculation is valid.

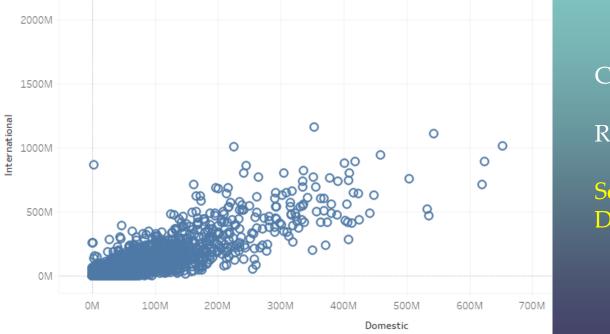

There is a new variable "-Worldwide".

Under Marks, change Automatic to Gantt Bar.

Drag new variable "-Worldwide" to "Size" under Marks.

#### **International vs. Domestic Box Revenue**

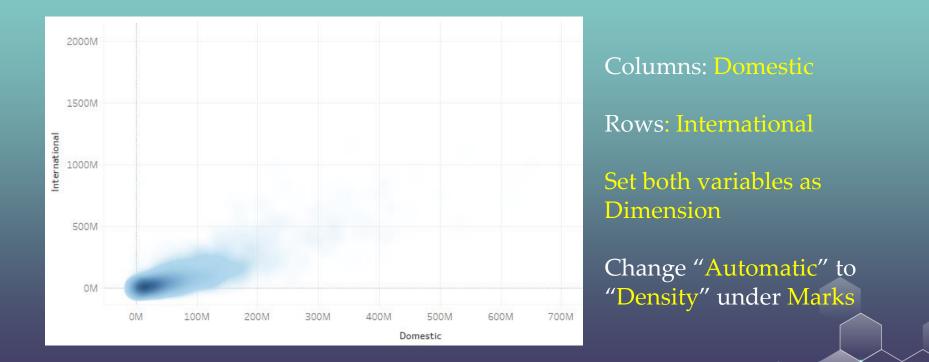

Columns: Domestic

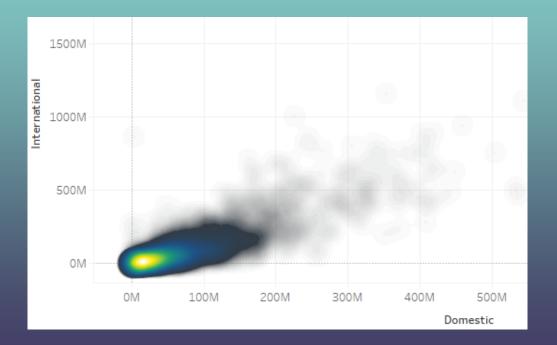

**Rows:** International

Set both variables as Dimension

### **International vs. Domestic Box Revenue**

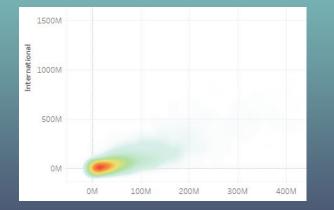

#### **International vs. Domestic Box Revenue**

Change "Automatic" to "Density" under Marks

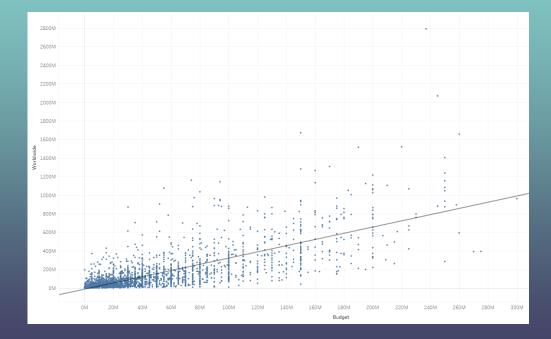

Set Colors to "Density-Multicolor" under Marks

# **Density Heatmap**

In a density heatmap, in places where the observations are dense (i.e., many points in the area), the heatmap displays a warm color. In places where observations are sparse, the heatmap displays a cold color.

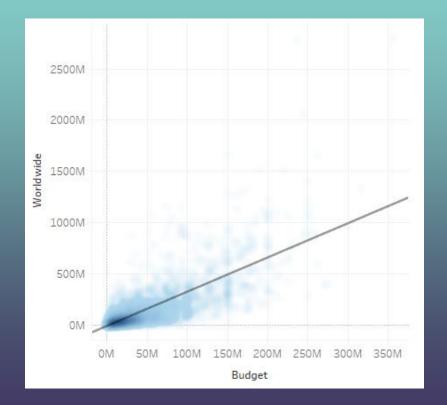

# **Regression Line**

Here, we use budget as the independent variable (i.e., Column) and worldwide box office as the dependent variable (i.e., Row) and draw the regression line.

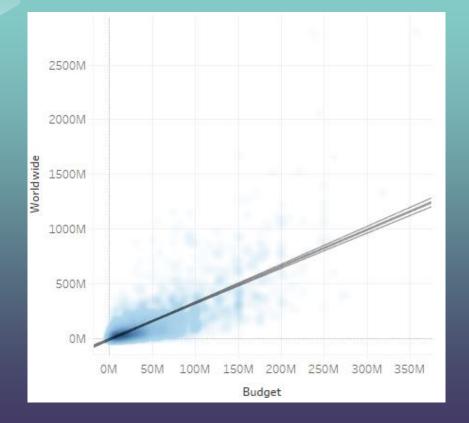

# **Regression Line**

Then, we change the figure to a density heatmap to make it look better.

# **Regression Line**

#### Click and edit the regression line.

Under Options menu, check "show confidence bands".

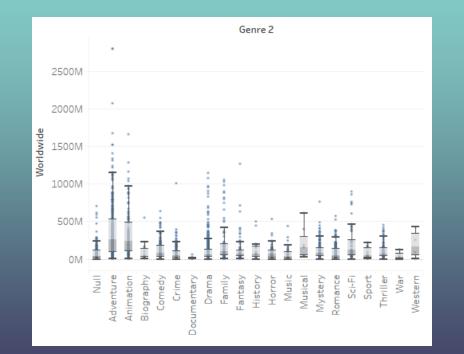

### **Confidence Bands**

Tableau confidence bands show upper and lower 95% confidence lines. That is, with probability 95%, your regression line falls within your confidence bands. You can visit the Wikipedia for the detailed description of the confidence bands (click <u>here</u> to visit Wikipedia page).

# **Box and Whisker Plot**

# **Box and Whisker Plot**

Meaning of the box: 50% of the observations fall within the box (25% of the data are greater than the box limit and 25% are smaller than the box limit).

Line within the box: The median of your data.

The other two lines, called upper and lower Whisker, are more complex. For details, please refer the Wikipedia on this topic <u>here</u>.

# **Box and Whisker Plot**

How to draw the Box and Whisker Plot?

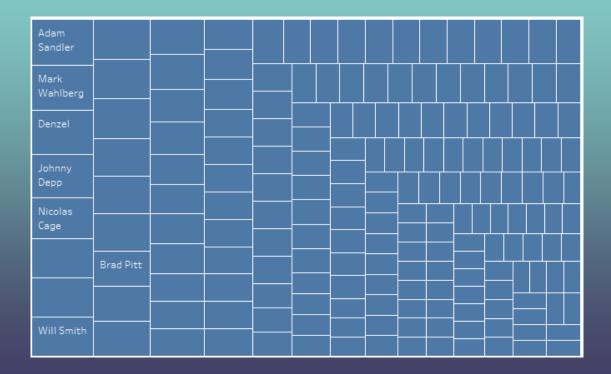

Use Genre 2 as rows and Worldwide as columns.

Under Analysis (top bar), *uncheck* "Aggregate Measures".

Under Show me, choose III

## **Actor/Actress Treemap**

Check Aggregate Measures again!

Columns: Main Actor 1

Drag "Main Actor 1" to from Columns to Text

Drag "Mojo\_budget\_data (Count)" to Size

You can filter the figure by Mojo\_budget\_data (Count)

### Actor/Actress Word Cloud

Milla Jovovich Julia Roberts Anna Faris Mel Gibson Harrison Ford Ashton Kutcher Shia LaBeouf Anna Kendrick James McAvoy Charlize Theron Sean Penn John Travolta Scarlett Johansson Anthony Hopkins<sub>Kevin</sub> Hart Jack Black Natalie Portman Steve Martin Colin Farrell Julianne Moore Jason Statham Brendan Fraser Steve Carell Daniel Craig Dennis Quaid Cameron Diaz Aaron Eckhart Richard Gere Clive Owen Owen Wilson Chris Hemsworth Ben Affleck Sandra Bullock Christian Bale Hugh Jackman Bradley Cooper Reese Witherspoon Will Ferrell Russell Crowe Zac Efron Morgan Freeman Ben Stiller Channing Tatum Angelina Jolie JOHNNY Depp Emily Blunt Joseph Gordon-Levitt Ethan Hawke Tom Cruise Liam Neeson Leonardo DiCaprio Matthew McConaughey Nicole Kidman Denzel Washington Dwavne Johnson Mark Wahlberg Brad Pitt Nicolas Cage Robert De Niro Will Smith Samuel L. Jackson Adam Sandler Ice Cube Matt Damon Robert Downey Jr. Jake Gyllenhaal Vin Diesel Ryan Reynolds Ewan McGregor Jim Caviezel Kevin Spacey Jason BatemanCuba Gooding Jr. Sylvester Stallone John Cusack Billy Bob Thornton George Clooney Kristen Stewart Bruce Willis Eddie Murphy Gerard Butler Michael Fassbender Edward Norton Daniel Radcliffe Jim Carrey Melissa McCarthy Keanu Reeves Jackie Chan Helen Mirren Ren??e Zellweger Mike Myers Ryan Gosling Jennifer AnistonJesse Eisenberg Meryl Streep Martin Lawrence Patrick Stewart Kate Beckinsale Seth Rogen Chris Pine Kevin Costner

Following the previous step, you can change "Automatic" to "Text" under the Marks box.

Again, you can use filters to only keep the frequent names.

### Actor/Actress Word Cloud

Shia LaBeouf Steve Carell Harrison Ford Ben Affleck Ben Stiller Matt Damon Will Smith Tom Hanks Brad Pitt Will Ferrell Matt Damon Will Smith Daniel Radcliffe Vin Diesel Tom Cruise Hugh JackmanGeorge Clooney Leonardo DiCaprio Dwayne Johnson Robert Downey Jr. Bruce Willis Johnny Depp Keanu Reeves Matthew McConaughey Denzel Washington Daniel Craig Adam Sandler Nicolas Cage Jennifer Lawrence Mark Wahlberg Jack Black Christian Bale Chris Hemsworth Russell Crowe Nicole Kidman Chris Pratt Jim Carrey Ryan Reynolds Eddie Murphy Mike Myers

Now, replace "Count(Mojo\_budget\_data)" by "Worldwide".

Then, a bigger name means the actor/actress brings more box office worldwide.

### Actor/Actress Word Cloud

Mike Myers Shia LaBeoufChris Pratt Daisy Ridley Ben Affleck Elijah Wood Sam Worthington Ben Stiller Hugh Jackman **Tom CruiseVin Diesel Johnny Depp**Daniel Craig Adam Sandler **Robert Downey Jr**. Dwayne Johnson Leonardo DiCaprio Mark Wahlberg Daniel Radcliffe Jennifer LawrenceTom Hanks Christian Bale Will Smith Kristen StewartSandra Bullock Matt Damon Brad Pitt Steve Carell

And you can also color the actor/actress by his/her box office worldwide.

Drag "Worldwide" to color and you will get this cloud.
