

SEARCH ENGINE OPTIMIZATION

Improve your ranking on Google

Which search engines have you used?

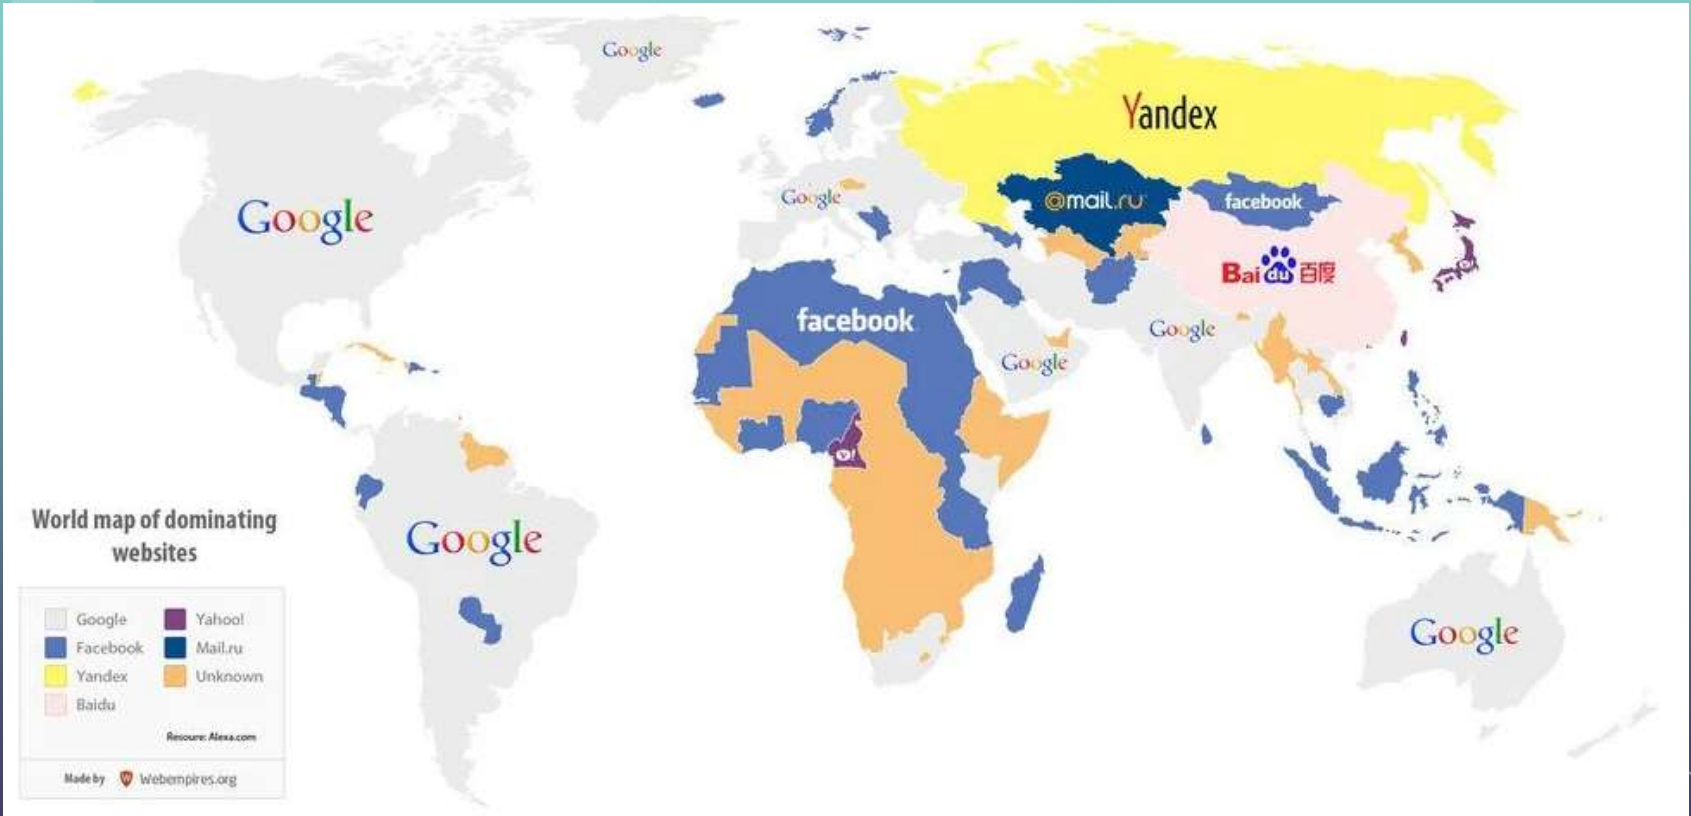

Which search engines have you used?

Which search engines have you used?

Search websites are popular...

What are the top websites in HK?

Top 10 websites in HK

Today's Agenda

01

Mechanism

How search engine works?

02

Usage

How to make my rank higher on a search engine?

WHY IS SEARCH ENGINE IMPRORTANT?

“A search is a statement of intent.”

– Susan Athey, Former Chief Economist at Microsoft

Search engines are the doorway to the Internet

80% of sites are found through search engines.

TYPES OF SEARCH

Informational: Generic Search

(e.g., “high cholesterol”, “school ranking”)

Navigational: Brand Names

(e.g., “United Airlines”, “HKTV Mall”)

Transactional: Specific information on products/services

(e.g., “Macbook Pro”, “Diet Coke”)

HOW DO SEARCH ENGINES WORK?

HOW DO SEARCH ENGINES WORK?

Crawl the web via spiders (a.k.a. web crawlers).

It goes from page to page.

It follows links and recording what it finds.

CRAWLABLE

CRAWLABLE

HOW DOES GOOGLE FIND YOUR HOMEPAGE?

You can submit an individual URL to Google.

Google finds you through links from other websites.

Google finds you from online libraries, books and other materials...

HOW DO SEARCH ENGINES WORK?

After crawling, search engines *index* the pages.

The index is what the spider creates. It is a “library” of pages on the Internet. The search engine creates databases for keywords, so it knows where to go to when a user enters a query.

Yes, we know you are there (crawlable) but we cannot communicate with you (non-indexable). (Search engine only speaks HTML)

Your webpage may have Images, Flash files, Java applets, and other non-text content.

HOW DO SEARCH ENGINES WORK?

After indexing, search engines *process user queries*.

Users input a search query by typing a keyword or phrase into the search bar. The engine then checks its index to find relevant pages and delivers them ordered from most relevant to least relevant.

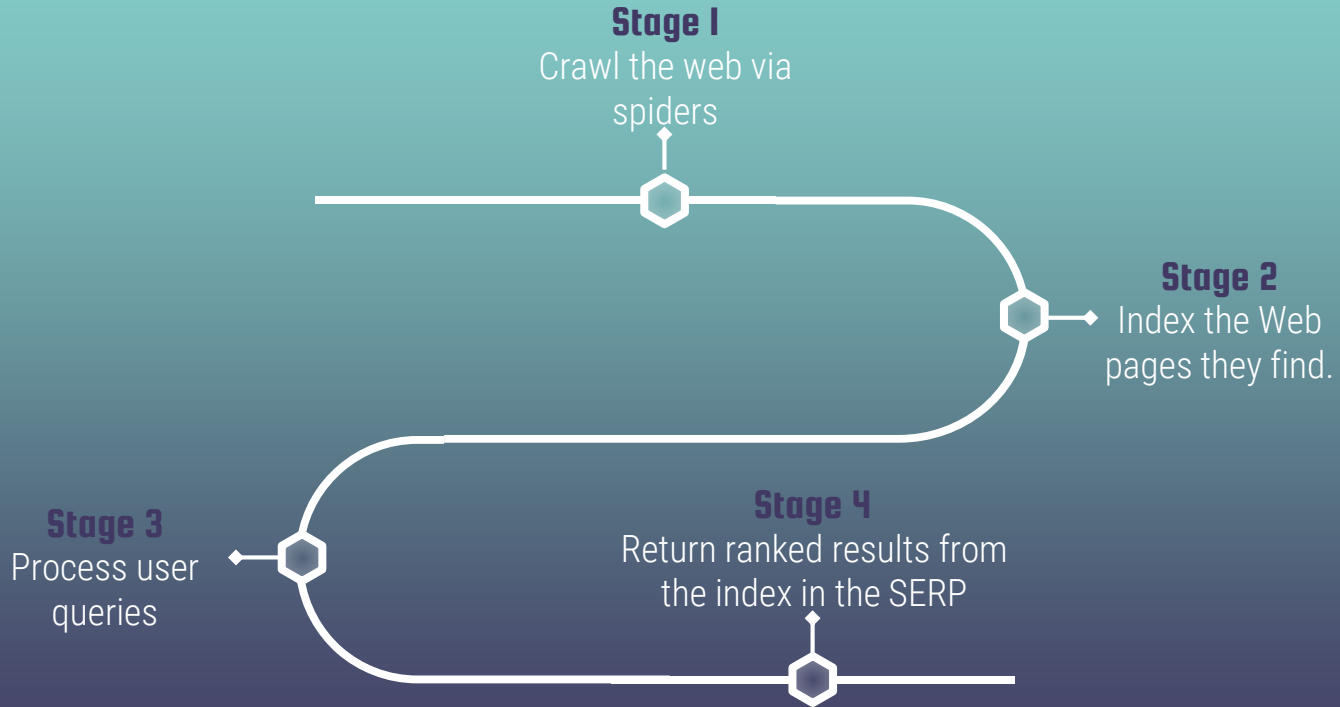

HOW DO SEARCH ENGINES WORK?

Finally, search engines *return ranked results from the index in the SERP (search engine results page).*

Users input a search query by typing a keyword or phrase into the search bar. The engine then checks its index to find relevant pages and delivers them ordered from most relevant to least relevant.

SEARCH ENGINE OPTIMIZATION

QUESTION

How many users will visit the second page of the search results?

50%? 20%? What is your estimate?

QUESTION

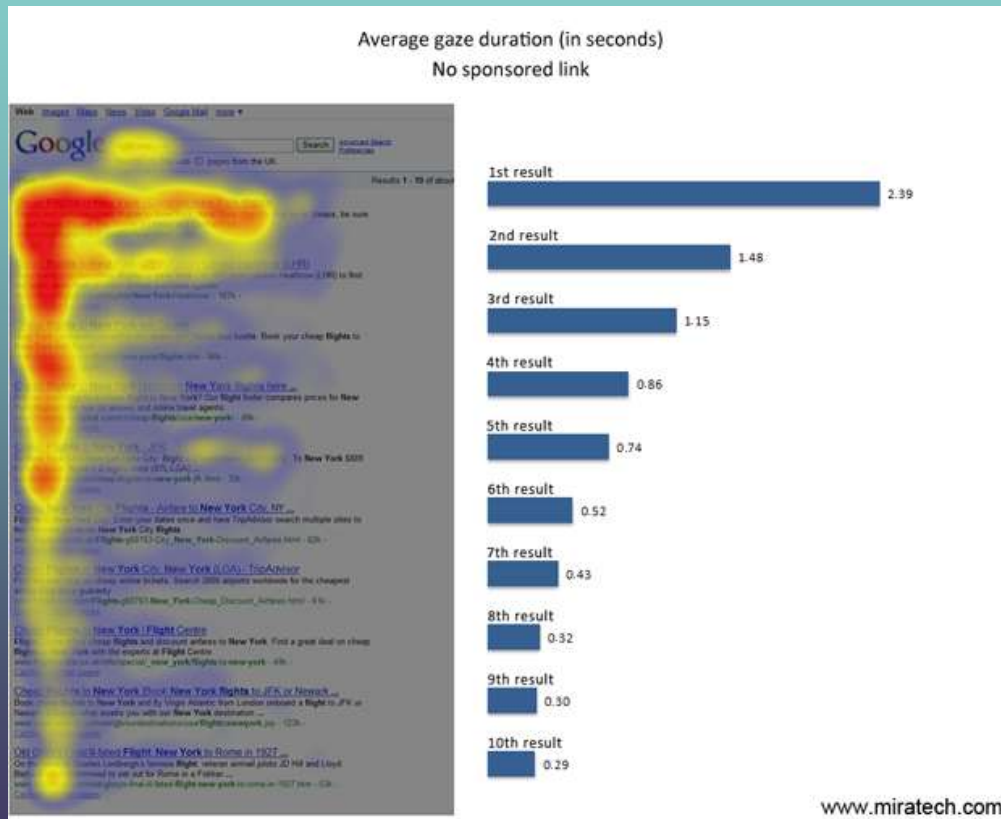

How many users will visit the second page of the search results?

50%? 20%? What is your estimate?

It is 6%! Only 6% of the users bother to visit the second page!

EYE TRACKING STUDIES REVEAL AN F PATTERN

SEO CONSIDERATIONS

What are the goals of our business?

Who do we want to visit our website?

What do we want our target audience to do on our website?

What pages do we want them to visit and what path must they follow to get there?

ON-PAGE AND OFF-PAGE SEO

On-page (or on-site):

Technical Structure (Page Title, Headers, Page Body, Image Tags, URL, Meta Description)
Content Tactics

Off-page (or off-site):

Backlinks (who link to you)
Social Engagement

GOOGLE SAYS THAT

Relevance of webpages

Next, algorithms analyze the content of webpages to assess whether the page contains information that might be relevant to what you are looking for.

The most basic signal that information is relevant is when a webpage contains the same keywords as your search query. If those keywords appear on the page, or if they appear in the headings or body of the text, the information is more likely to be relevant.

Beyond simple keyword matching, we use aggregated and anonymized interaction data to assess whether search results are relevant to queries. We transform that data into signals that help our machine-learned systems better estimate relevance.

The Six Secrets of On-the-Page Optimization

#1: The most important piece of on-page optimization is title of the page

Displayed at the top of the browser and in the natural listings
Each page should have its own title; unique and includes chosen keywords;
short and focused.

ACCURATE TITLE

Accurate title: It appears elsewhere and affects visitors.

ACCURATE TITLE

www.allrecipes.com › recipe › fresh-southern-peach-co... ▾

Fresh Southern Peach Cobbler Recipe - Allrecipes.com

Preheat oven to 425 degrees F (220 degrees C). In a large bowl, combine peaches, 1/4 cup white sugar, 1/4 cup brown sugar, 1/4 teaspoon cinnamon, nutmeg, lemon juice, and cornstarch. Toss to coat evenly, and pour into a 2 quart baking dish. Bake in preheated oven for 10 minutes.

The Six Secrets of On-the-Page Optimization

#2: Incorporate key words into your URL (your page address)

SIMPLE URL

Make your URL easier to understand:

Good example: www.example.com/green-dress.html

Bad example: www.example.com/greendress.html

Make your URL short:

Good example: www.example.com/dress/

Bad example: www.example.com/category/dress/

Contain keywords in your URL:

Good example: <http://www.example.com/green-dress.html>

Bad example: <http://www.example.com/112.html>

The Six Secrets of On-the-Page Optimization

#3: The meta description does not influence the ranking so much, but substantially impacts the “click ability” of your result as it is what the search engine picks up.

The Six Secrets of On-the-Page Optimization

#4: Headers: Visible in the source code, contribute towards Google's perception of the subject matter of the page. Make sure the header has the keyword.

#5: Page Body: Context and proximity in the text play a role – keywords should be close to the beginning of the body copy.

The screenshot shows a website for "Family Wellness MASSAGE THERAPY". The page is annotated with brackets on the left side:

- header:** Points to the top navigation bar containing the logo "Family Wellness MASSAGE THERAPY" and a menu with links: HOME, ABOUT, SERVICES, FAQ, CONTACT.
- body:** Points to the main content area, which includes a large image of a woman and a child sitting on a bench by a lake, a red banner with the text "Think Health. Think Massage." and two buttons: "LEARN MORE ABOUT US" and "CONTACT US TODAY". Below this is a paragraph of text: "Are you looking for a professional, registered massage therapist? Simple Massage Therapy has 4 registered massage therapists who can provide clinical massage." followed by another paragraph: "We are committed to your long term health and well-being. Our multi-disciplinary clinic provides a balanced approach to a healthy lifestyle. Enhance your health and improve your performance with our treatments." and a final paragraph: "We welcome you to come explore all the benefits you'll enjoy as one of our valued guests. Our professional staff is committed to offering the best massage therapy in Mainland."
- footer:** Points to the bottom section of the page, which includes the text "Family Wellness Massage Therapy", the address "8878 Main Street, Suite 125, Mainland, BC V3R 4K5", the phone number "Phone: 607 854 3210", and a small copyright notice "Copyright © 2020 Simple Massage Therapy. All Rights Reserved." and "Powered by Website.com".

The Six Secrets of On-the-Page Optimization

#6: Alt tags are descriptions of images on your website
Help people who use screen readers to use your website
Allow Google to interpret images, index them and support your ranking

```
... (*id="defect-image-offensive", "value": "Offensive or adult content"),  
(*id="defect-image-extra-items", "value": "Shows additional items"),

500px;">  
            
```

OTHER TIPS: CLEAR WEBSITE NAVIGATION

**Content Marketing Pages
& Product Pages**

[Homepage](#)

OTHER TIPS: MOBILE FRIENDLINESS

Simplify the mobile version of your website to reduce the load time.

Design for the fat finger: Make sure your buttons are not too small.

Don't use Flash: The plugin may not be available on your user's phone, which means they'll miss out on all the fun. If you want to create special effects, use HTML5 instead.

ON PAGE SEO: CONTENT TACTICS

Regular, helpful content targeted at your audience (tutorials, how to guide, etc.).

Make sure content is keyword rich – but not too rich

Use synonyms, avoid keyword stuffing

Rule of thumb: keyword density 2-4% of content

Freshness or signs that your site is alive and growing (e.g., news feed).

BRAINSTROMING IDEAS

Go to the following HKU page: <https://www.fbe.hku.hk/>

Pair with your classmates, can you come up with some ideas to improve the content/structure of this webpage?

Think from the perspective of a potential visitor, Prospective students,
Current students, Alumni, Employee, Donor

Provide rationale for the design ideas

Landing Page Optimization: AB Testing

A/B testing (i.e., split testing) is an important tool for identifying the optimal creative.

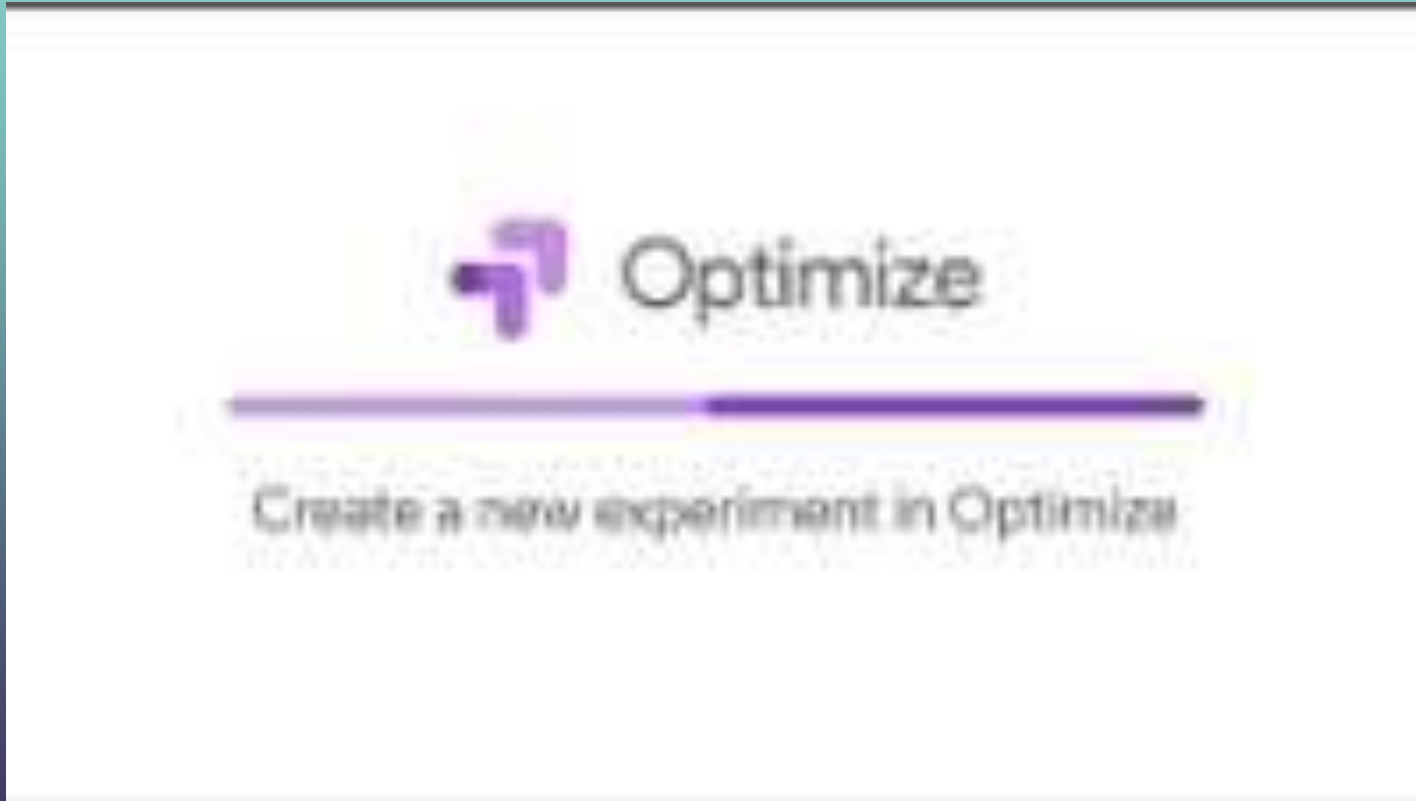

Landing Page Optimization: AB Testing

There are many “plug and play” tools for AB testing.

Google optimize for content experiment.

AB Testing: A Quick Tutorial

ON-PAGE AND OFF-PAGE SEO

On-page (or on-site):

Technical Structure (Page Title, Headers, Page Body, Image Tags, URL, Meta Description)
Content Tactics

Off-page (or off-site):

Backlinks (who link to you)
Social Engagement

If you only had a video of a party, how could you tell who is most influential?

BACKLINKS

Inbound links (backlinks): Links that point back to your website from an external site

Based on a citation concept; considered 'online currency'
A 'silent' vote of confidence from the site linking to you

When Google began, this was the most important factor to determine ranking/relevance. How?

- Number of backlink sites
- Quality of backlink sites
- Share of links on backlink sites

PAGE RANK

PageRank is a numeric value measuring the importance of a page on the web. Named after *Larry Page* (co-founder of Google)

A link analysis algorithm that assigns a numerical weighting to each element (webpage) in the entire set (Web) to measure the importance of the page.

Sum of the PageRank of all pages in a system is set to 1.

PAGE RANK

Let $PR(U)$ be the page rank of webpage U .

Assuming m webpages (V_1, \dots, V_m) send incoming links to page U , then

$$PR(U) = \frac{PR(V_1)}{L(V_1)} + \frac{PR(V_2)}{L(V_2)} + \dots + \frac{PR(V_m)}{L(V_m)}$$

$L(V_j)$ = number of outgoing links from website V_j

PAGE RANK

Here, B and C send links to A, so $PR(A)$ is affected by $PR(B)$ and $PR(C)$.

Similarly, $PR(A)$ affects $PR(D)$.

$$PR(A) = \frac{PR(B)}{3} + \frac{PR(C)}{2}$$

PAGE RANK EXAMPLE

PAGE RANK EXAMPLE

Only C sends a link to A: $PR(A) = PR(C)$

Only A sends a link to B: $PR(B) = PR(A)/2$

Both A and B send links to C: $PR(C) = PR(A)/2 + PR(B)$

And all ranks add to 1: $PR(A) + PR(B) + PR(C) = 1$

Solve the model, we have $PR(A) = 0.4, PR(B) = 0.2, PR(C) = 0.4$.

LINK BUILDING

How to get more inbound links?

Create link worthy content

Write content that others want to read and link; Create tools and documents that others want to use; Create and host a game that others want to play

Content variety

Many types of contents available; Examples include blogging, white papers, videos, webinars, podcasts, webcasts, and infographics

Web PR

Submitting guest blog posts to popular blogs in your industry. Generally, you will get a link back to your website in an author box at the top or bottom of your post's content. Submit your website to applicable industry directories

Competitor analysis

Who is linking to your competitors? They may link to you.

Track Inbound Links

There are several tools that help you track inbound links to your website. For example, you can use **ahrefs** to track the links:

ahrefs: <https://ahrefs.com/backlink-checker>

Track Inbound Links

Exercise: Go to **ahrefs** to analyze the website of HKU and HKUST business school:

HKU Business School: <https://www.fbe.hku.hk/>

HKUST Business School: <https://www.bm.ust.hk/>

What did you find? What can HKU learn from HKUST?

SEO: The White and Black

White Hat SEO (legitimate):

Conforms to the search engines' guidelines and involves no deception
Create content for users and search engines

Black Hat SEO (illegitimate)

Going overboard with SEOs...

Trying to deceive search engine to increase rank

Use reputable SEO company & beware guarantees “#1 site on Google”

Black Hat SEO

Just a few examples from 1000s of such practices --- you will be penalized by search engines when uncovered.

Keyword stuffing: overusing the same keywords throughout one page in order to maximize its visibility and organic traffic.

We are a **web development company in Bend, Oregon**. As a **web development company who does web design and SEO**, we are able to create **web designs that are SEO friendly**. Yes, we do good **web design and SEO** and can help you develop a **web design that is SEO friendly**. When it comes to looking for a **web development company in Bend, Oregon**, you need to make sure they are experienced in **web design and SEO**. Because experience in **web design and SEO** is very important. You need good **web design and SEO** from a good **web development company in Bend, Oregon** to rank well on Google. So hire us, your **web development company in Bend, Oregon**—experienced in **web design and SEO**.

Black Hat SEO

Cloaking: Serve fake content to search engine spider.

Black Hat SEO

Paid Links: pay other websites to link to their page to get high the rankings.

Example: JCPenny paid other websites to link to JCP.com. After being caught, it was blocked from ranking in the first page of results at Google for 3 months. Lost \$30mm in sales.

GOOGLE PANDA

Google Panda is an algorithm used to reward high-quality websites and diminish the presence of low-quality websites in Google's organic search engine results.

It punishes **thin content, duplicate content, low-quality content, high ad-to-content ratio, content mismatching search query.**

It rewards **original content and outbound links to reputable websites.**

Website Evaluation

Tracking Progress

Tracking your progress (and progress of competitor) helps identify the following:

Strength: Which pieces of content do users spend most time on?

Weakness: Which pieces of content do users spend least time on?

Opportunities: Are many users accessing the mobile version of your website?

Threats: Are your competitors enjoy higher search ranking?

Simple Methods Available

There are two, “off-the-shelf” methods that you can use almost immediately to check progress

HubSpot website grader (<https://website.grader.com/>): Can evaluate any website you enter into their query Assess the health of website architecture

Google Analytics: Need to have administrative access to the website as webmaster Obtain insights from website traffic

Using HubSpot Website Grader

3/30

Performance

Optimizing your website's performance is crucial to increasing traffic, improving conversion rates, generating more leads, and increasing revenue.

Using HubSpot Website Grader

PAGE SIZE

55.2_{MB}

Vaster than empires and more slow.

The heavier the site page, the slower the load. For optimal performance, try to keep page size below 3MB.

PAGE REQUESTS

159

Now that's a lot of requests.

The more HTTP requests your website makes, the slower it becomes. Combining files can help reduce the number of requests.

PAGE SPEED

17.6_{SEC}

We need to talk.

Best-in-class webpages should become interactive within 5.3 seconds. Any slower and visitors will abandon your site, reducing conversions and sales.

Using HubSpot Website Grader

PASS

LEGIBLE FONT SIZE

Easy on the eyes.

Visitors may have difficulty reading small text, especially on mobile devices. We recommend at least 12px.

FAIL

TAP TARGETS

Where do I click?

Mobile-friendly pages perform better in search results. Make sure interactive elements like buttons and links are not too small or too close together.

PASS

RESPONSIVE

Fantastic! You're ready to face the future.

Responsive design gives you a bump in search rankings for searches on mobile devices.

Using HubSpot Website Grader

PERFORMANCE	CURRENT	RECOMMENDATION	
Page size	55.2MB	< 3MB	Lighten your pages by removing or compressing heavy content such as images and video.
Page requests	159	< 30	Combine files to minimize the number of HTTP requests your site makes.
Page speed	17.6Sec	< 5.3Sec	Speed up your site by lightening up your site pages, compressing images and video where possible.
Image Size	No	Yes	Use responsive images or SVGs to optimize your images for different screen sizes.
Minified JavaScript	No	Yes	Use a minifier tool or contact your web host to ensure your JavaScript is minified.

How to analyze traffic of a public website?

Go to <https://www.similarweb.com/>

The screenshot shows the Similarweb profile for hku.hk. At the top, there is a header with the domain 'hku.hk', a '+ COMPARE' button, and a 'FULL REPORT' button. Below this is a 'March 2021 Overview' section with a brief description of the university. To the right of the text is a 3D architectural rendering of the university campus. Below the text are icons for 'Related Mobile Apps' on Google Play and the App Store, with a 'See more' link. A security badge from Check Point states 'This website is safe' and 'No threats detected'. At the bottom, three ranking cards are displayed: 'Global Rank' (Worldwide) at 9,250, 'Country Rank' (Hong Kong) at 53, and 'Category Rank' (Science and Education > Universitie...) at 1.
